

Cover Letter,

Hi I'm Juan Labrada,

I'm an experienced software developer, with over 10 years working on web applications with Java, Javascript, NodeJS. 5 of them also working front-end mainly VueJS.

In addition to my programming skills, I'm a Certified Scrum Master by Scrum.Org with experience as an Agile Coach. My favorite development framework is Extreme Programming. I have worked in global companies like Experian, midsize companies, and startups.

With excellent communication skills and being a great team player, I love helping teams grow and improve delivering software.

I'm proud a many of the products I have helped built in the past and more recently of participating the process that turned Experian into one of the 100 most innovative companies in the world as per Forbes.

I'm looking for a company where I could help developing innovative software and that allows me to continue growing as a software developer.

I would be glad to join an interview to learn more about this opportunity.

Thanks

Best regards,

Juan Labrada
