Resume

I do the software that inspire others make a better world. I have developed a strong motivation for learning and using agile methodologies and practices during more than 15 years as Software Developer, five of them working as Project Manager and Team Leader. I'm looking for a great place to work where I can share my experience and learn from others.

Working Experience

2009 Up today BICEVIDA SA. (Insurance Company)

www.bicevida.cl

As Individual Insurance and Investments Account Systems Project Manager and Team Leader:

I'm in charge of a team of 6 professionals that maintains the Individual Insurance and Investments Account Systems. Leading projects for adding new capabilities and functionalities to the systems and keeping the systems operating in production environment.

I'm responsible for gathering and developing customer requirements and designing software solutions, validating requirements against system architecture. I'm also responsible for planning and managing the requirements until implementation in the production environment.

I developed the Team vision and strategy and introduced them to agile software practices like Test Driven Development, Software Refactoring, Pair programming, Release and Iteration Planning, Mock objects and Kan-ban, and we defined the coding standard for our applications. As an outcome of the continue improvement approach we followed we developed Outxel our requirements tracking application.

I've been working with software providers defining the RFPs, evaluating proposals and managing projects for several modules of the Investments Account System and other systems.

Actively took part in defining the procedures for working with Subversion and branches with the QA depart

Projects:

- Individual Insurance Systems Maintenance project. Technologies J2EE, ASP, COBOL, Sql server, Oracle. Internal Team.
