Resume

I create software that inspires people make a better world. I have developed a strong motivation for learning and using agile methodologies and practices during more than 15 years as Software Developer, seven of them working as Scrum Master, Project Manager and Team Leader. I'm looking for a great place to work where I can share my experience and learn from others.

Working Experience

WPlex – Transportation Planning and Monitoring Services – Brazil

Senior Systems Analyst

2018-Today

I'm working as a senior systems analyst, creating the infrastructure for migrating the legacy system, and helping the team adopt agile practices.

Experian – Credit Report – USA

Senior Software Developer – Scrum Master

2015-2018

I worked as a Software Developer and Scrum Master in the Compliance Applications team. I played the Scrum Master role for a few projects, as well as helped the team migrate from a Waterfall SDLC into an agile one. I coached the team on Scrum activities and agile practices as TDD and code refactoring. And I took an active role in the company transformation into agile practices. Both technically, designing the new RESTFull Api for the Dispute System, and mentoring other newcomers into the Scrum Master role. My team won one of the Experian global hackathons.

Being a global company, there I was exposed to working with developers and staff all around the world, mainly from India, UK, USA, Canada, Vietnam, and Malaysia.

Bicevida – Insurance Company – Chile

Scrum Master

2009-2015

I was in charge of a team of 6 professionals that maintains the Individual Insurance and Investments Account Systems. Leading projects for adding new capabilities and functionalities to the systems and keeping the systems operating in production.

I was responsible for managing the Product Owner backlog, help the product Owner prioritizing User Stories and designing software solutions, validating solutions against system architecture. I was also responsible for implementation in the production environment in a mixed Agile(dev)-Waterfall(DevOps) process.

I developed the Team vision and strategy and coached the team into agile software practices like Test Driven Development, Software Refactoring, Pair programming, Spring Planning, Mock objects and Kanban and Scrum. Also we defined the coding standard for our applications. As an outcome of the continuous improvement approach we followed we developed Outxel our Backlog management application.

Actively took part in defining the procedures for working with Subversion and branches with the QA department.

Seguros Falabella – Insurance Broker – Chile

Scrum Master – Team Coach

2008 – 2009

I was in charge of a team of 2 professionals where we developed 2 new products and worked in the maintenance of the exiting insurance selling application. I worked in the company's first mobile application.

I was responsible for managing the product backlog, and helping the product owner prioritizing the User Stories. I worked closely with the DevOps team deploying the applications on production.

Kaizen LA – Software Development Services – Chile

Scrum Master-Project Manager– Team Coach

2006 – 2008

I was in charge of a team of 7 professionals that developed products for customers in several industries. I was responsible for gathering User Stories and designing software solutions, as well as negotiating scope and priorities with customers. Also, I was responsible for managing the backlog until delivery to clients.

I introduced the team to agile software practices, XP. We defined the coding standard for our applications. We implemented a development and delivering pipeline that optimized the whole process of Versioning, Development, QA, Packaging and Delivery.

Soluciones Integrales – Software Development Services – Cuba

Software Developer – Team Coach

2004 – 2006

I worked as a software developer in charge of the server-side of the Impactia Enterprise Suite (<http://www.impactia.com>). Along with my software development duties, I introduced the team to Extreme Programming practices and lead the team in a new software development methodology. I helped with defining the coding standard. Also, I developed a continuous integration server (Luisitin). And I automated the CD ISO creation for Impactia Suite.

Cubacel – Mobile Telecom – Cuba

Software Developer

2000 – 2004

I worked as a software developer in the development and maintenance of several applications, mainly in ASP.NET and Ultimus Workflow. I took and developed the requirements from customers.

ONRM – Mining – Cuba
